## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to claims 5-6 and 8 have been considered but are moot in view of the new ground(s) of rejection.

## **PRIOR ART REJECTION**

### **Statutory Basis**

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

### **The Rejections**

Claims 5 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by  
Admitted Prior Art (hereinafter APA).

APA discloses a semiconductor structure with

(5) a chip (see paragraph [0005]) with an active surface (102) having at least a flip-chip bonding pad (108) and at least a test pad (120) thereon, wherein the test pad (120) is positioned on the peripheral section (104) of the active surface (102) and is electrically connected to the flip-chip bonding pad (108), and the chip (see paragraph

Art Unit: 2818

[0005]) further has at least a trace line (106) on the active surface (102) for connecting the test pad to the flip-chip bonding pad (108);

a passivation layer (110) formed over the active surface (102), wherein the passivation layer (110) exposes the flip-chip bonding pad (108) (see paragraphs [0006]-[0007]. Figures 1A-1B);

(8) wherein the chip furthermore comprises a bump (120) attached to the flip-chip bonding pad (108) (see Figures 1A-1B).

#### ***Allowable Subject Matter***

Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
